GRID SIDE BEACON LIGHT SET
BE SEEN FROM ALL ANGLES - DAY AND NIGHT

We understand being able to see in the dark is important, but we also believe that so is being visible to cars. A study by the US National Highway Traffic Safety Administration (NHTSA) showed 30% of bicycle fatalities occur in intersections.*

The Grid Side Beacon was imagined to work in tandem with front/tail lights to keep you more visible from a full 360 degrees. Designed to be mounted to either side of your fork with silicone straps, the Grid Side Beacon can be used as a stand-alone light, or as part of our Luminate 360 Light Set. Spec'd with eye-catching amber-colored LEDs, weatherproof, rechargeable Grid Side Beacon set comes with a dual-head USB charging cable and has a run time of up to 6 hours for multiple days of commuting.

OUTPOST BIKE & CAMP MULTI-PURPOSE FRONT LIGHT

A BIKE LIGHT, HEADLAMP & LANTERN

Whether you are making coffee in camp before dawn, or fixing a flat late at night, it's helpful to have your hands free with a light focused on your work. We developed the Outpost Bike & Camp headlamp with that specific need in mind. Additionally, we installed a silicone "lampshade" over the light source that can allow you to bring the light down to a soft ambient glow, should the mood strike you. On or off the bike, in or out of camp, this light is meant to provide you with the extra versatility you need to focus on the task at hand, by getting up to 400 lumens of light out of your hands, and onto your forehead.
