## **FOR EVERY RIDE**

The perfect option for those looking for a great value tire that is tubeless-ready. It comes with BlackChili Compound and has an all-new 4-ply construction, that perfectly balances puncture protection and rolling resistance. Whether training, commuting or going the distance - the Grand Prix TR has you covered.

With our unique tread compound, we have revolutionized the sport of cycling. With the legendary BlackChili Compound we have answered the eternal question of the best balance of grip and rolling resistance for cycling. The latest polymers as well as specially developed carbon black particles and filler materials guarantee unique performance, be it on a road, gravel or a mountain bike, for time trialling or downhill.

All **Tubeless Ready** tires have been designed with versatility in mind. It's your choice: set up tubeless using Sealant or use an innertube.

The robust **4-ply construction** balances rolling resistance, low weight and puncture resistance.

#### KNOWLEDGE CONTI

### **Tubeless Ready:**

For initial mounting we recommend to use at least 30 ml of Conti RevoSealant per tire. Then spin the tire (wheel) to spread the Conti RevoSealant inside of the tire and pump to the allowed maximum pressure. Check the pressure before the next ride and adjust to your desired PSI.

This tire is Hookless compatible to its limited max. pressure. Please check wheel instruction and tire packaging for detailed information.

## **A PERFECTED STORM**

Extensively tested in the wind tunnel, the AERO 111 represents the ultimate aerodynamic tire without compromise. To save every watt we created the unique tread pattern together with the experts at Swiss Side.

BlackChili compound is renowned for its perfect balance of grip and low rolling resistance. For AERO 111 we use a race-optimized BlackChili, offering low rolling resistance in combination with excellent grip in wet and dry conditions.

The combination of all these features means on top of the low aerodynamic drag, the AERO 111 offers low rolling resistance, good puncture resistance and exceptional grip in both wet and dry conditions.

Vectran, our patented technology from the GP5000 family. Selected for AERO 111 because of its unparalleled level of protection from sharp foreign objects, whilst not affecting rolling resistance.

### **DT** SWISS

Swiss Side are the industry leader in aerodynamics. With over 20 years of experience in both Formula 1 and cycling, they are renowned for utilising the latest technologies and methodologies in computational aerodynamics and real-world testing.

ROAD

<

#### **TECHNOLOGY**

SIZES

### **DT** SWISS

The aero-optimized tread pattern certainly looks different: 48 little cavities are regularly distributed over its surface. These so-called **'vortex generators'** are the very feature that manage to control the turbulence in the airflow on the surface of the front wheel. Ultimately, this results in a perfected storm that allows for the reduction of drag of the entire wheel tire system.

### 

antinental's MEA

All **Tubeless Ready** tires have been designed with versatility in mind. It's your choice: set up tubeless using Conti RevoSealant or use an innertube.

### **AERO 111**

#### **TECHNOLOGY**

SIZES

7

Without AERO 111

The rider benefits less from the sailing effect because the early airflow separation increases the turbulent air flow. Thus, increasing aerodynamic drag of the wheel-tire system.

<

### With AERO 111

The sailing effect (forward acting force) increases. Even with lower rim profiles the rider benefits from this effect because the laminar airflow stays adjacent to the rim for a longer time. Thus, decreasing aerodynamic drag of the wheel-tire system at all speeds.

## FOR THE EXTRA MILE

### The strongest Grand Prix 5000: creates trust in all weather conditions and boosts your protection.

With our unique tread compound, we have revolutionized the sport of cycling. With the legendary **BlackChili Compound** we have answered the eternal question of the best balance of grip and rolling resistance for cycling. The latest polymers as well as specially developed carbon black particles and filler materials guarantee unique performance, be it on a road, gravel or a mountain bike, for time trialling or downhill.

The revolutionary approach in cycling. Embedded in the tire construction the Active Comfort Technology absorbs vibrations and smoothens your ride.

**Vectran** is spun from liquid crystal-polymer. This way a thermoplastic, multiple-thread yarn is created. As a comparison: This partially crystalline fabric is more cut-resistant than aramide and its tensile strength is five times higher than that of steel. A Vectran breaker is lighter, more flexible and effective against cuts than a comparable nylon breaker. Without effecting rolling resistance.

Lazer Grip, to make you one with the road. The lazered micro profile structure expands over the tire's shoulder and provides outstanding cornering.

SIZES

# **MODERN TIRE FOR THOSE NEW TO ROAD CYCLING**

Completely renewed, sporting a dynamic tread pattern design. Matches with a race bike, as well as a classic city road bike. Available in a wide range of dimensions and colors.

**PureGrip Compound** is derived from an activated Silica compound and is a good example of how we integrate customer feedback continuously into our research and development. This mixture technology fits in perfectly alongside the BlackChili Compound. The name PureGrip does exactly what it says; exceptionally good grip and durability are the distinguishing features of this compound. Engineered with PureGrip in our Performance products in our road and mountain bike ranges.

E ,25/

Suitable for E-Bikes: For our E-Bike tire we fall back on over 100 years' experience with moped and motorcycle tires. Those tires marked are also certified for S-Pedelecs. With their high quality structure, puncture protection is high and the rolling resistance is low offering protection from premature wear brought about by the additional driving force.

### Gator Hardshell

**TECHNOLOGY** 

SIZES

# **GOHARDSHELLORGOHOME**

Ideal when it comes to extremely long service life, for the next tour or the commute. Made for for rough surfaces and rugged tarmac. With DuraSkin<sup>®</sup> sidewall reinforcement.

Puncture protection and mileage are the strengths of Hardshell-**ProTection.** A wider PolyX Breaker<sup>™</sup>, the specialist against punctures, under the tread centre and shoulders provides for great reliability. The three-ply – each layer with 60 TPI – carcass covers the entire tire and makes it a real bastion against urban detritus. The outer sidewalls of the tire are reinforced with DuraSkin<sup>®</sup> fabric providing even more reliablility due to the casing being so well protected. Hardshell tires are the punctureresistant flagship amongst racing tires.

## **V** DuraSkin®

Tires with **DuraSkin®** sidewall protection can take a beating as they are designed for the most adverse conditions. In rough terrain on a cyclocross or a gravel bike, on commuter bikes where tires scrape along curbs, on touring bikes as they cross continents encountering many different road qualities and on the race circuit where they prove themselves in endurance events such as the Paris-Roubaix. The high-quality polyamide fabric reliably protects the wall of the tire. Tires with DuraSkin<sup>®</sup> can be identified by the characteristic brown mesh sidewall\*.

## **RIDE HOW AND WHERE YOU WANT: THE GLOBAL** NUMBER ONE FOR FIXED, MESSENGER AND URBAN **CYCLISTS**

The right tire when it comes to tough conditions. The right choice for a strong performance in the urban field and on tour.

With **PolyX Breaker™** car expertise comes to the bicycle tire sector. Polyester has been used successfully for years in car tires and has proved extremely effective. The extremely resistant polyester fibre is woven tightly crosswise. A very high fabric density is achieved which makes the breaker resistant not only to foreign bodies, but especially to punctures. The rolling resistance is not affected by this breaker.

## **V** DuraSkin®

### KNOWLEDGE CONTI

### **Tubeless Ready:**

For initial mounting we recommend to use at least 30 ml of Conti RevoSealant per tire. Then spin the tire (wheel) to spread the Conti RevoSealant inside of the tire and pump to the allowed maximum pressure. Check the pressure before the next ride and adjust to your desired PSI.

This tire is Hookless compatible to its limited max. pressure. Please check wheel instruction and tire packaging for detailed information.

KNOWLEDGE CONTI

### **Tubeless Ready:**

For initial mounting we recommend to use at least 30 ml of Conti RevoSealant per tire. Then spin the tire (wheel) to spread the Conti RevoSealant inside of the tire and pump to the allowed maximum pressure. Check the pressure before the next ride and adjust to your desired PSI.

This tire is Hookless compatible to its limited max. pressure. Please check wheel instruction and tire packaging for detailed information.

### Magnotal

**TECHNOLOGY** 

## 

SIZES

# **DOMINATE WHEREVER YOU RIDE**

Magnotal is designed for dry to wet conditions for hard, loose or muddy soils. It is the go-to solution for aggressive down-country, all-mountain and trail use cases. The newly designed tread pattern and casing sets a new standard for an all-rounder MTB tire – closing the gap to our Gravity range.

### **TERRAIN**

Ideal for **mixed** and **loose** terrain

### CASING

**Trail:** A light and durable single-ply carcass construction, ideal for Trail use cases.

### COMPOUND

Soft: Designed for descending-orientated use cases in the Trail and Enduro segment. The Soft compound offers high levels of grip with reasonable rolling resistance. Useable as a complete Front-Rear combination or a Front-wheel-only option for increased grip in Trail and All-Mountain use cases.

Grip: Designed for modern Cross-Country, Down-Country, Trail and gravel use cases. This compound offers an excellent balance of grip and rolling resistance and is the number one choice for all-round balanced characteristics.

**TECHNOLOGY** 

## 

SIZES

# **CONTROL OVER ROCK AND HARDPACK TERRAIN**

With low rolling resistance and contact edges for improved traction and braking, you can enjoy a fast gravity ride with the confidence of continuous grip when you need it most.

### **TERRAIN**

Perfect for hardpack, rocky surfaces

### CASING

**Downhill:** Most durable and reinforced carcass construction in gravity line up

**Enduro:** Durable single ply carcass construction with Apex to prevent snakebites

**Trail:** Comparable performance to the Enduro casing tailored for trail use cases

### COMPOUND

SuperSoft: Especially for Downhill and Enduro use cases where the main focus is descending. Tires equipped with this compound are for riders with a 100% focus on grip, traction, control.

**Soft:** The balance of grip and rolling resistance for gravity focussed use cases. High level of grip with a reasonable rolling resistance

Endurance: Compound with balanced properties on grip and endurance. With the endurance compound a high durability in combination with good rolling resistance and grip is achieved.

### KNOWLEDGE CONTI

### **Tubeless Ready:**

For initial mounting we recommend to use at least 30 ml of Conti RevoSealant per tire. Then spin the tire (wheel) to spread the Conti RevoSealant inside of the tire and pump to the allowed maximum pressure. Check the pressure before the next ride and adjust to your desired PSI.

This tire is Hookless compatible to its limited max. pressure. Please check wheel instruction and tire packaging for detailed information.

maximum grip.

**PureGrip Compound** is derived from an activated Silica compound and is a good example of how we integrate customer feedback continuously into our research and development. This mixture technology fits in perfectly alongside the BlackChili Compound. The name PureGrip does exactly what it says; exceptionally good grip and durability are the distinguishing features of this compound. Engineered with PureGrip in our Performance products in our road and mountain bike ranges.

## The perfect trail ride companion - not stingy on grip, ideal for full-suspension trail bikes. The snappy central knobs and grippy outer knobs means it offers

The ShieldWall System combines the optimum combination of high puncture protection and the low rolling resistance with low weight. This is made possible by an additional, all-round puncture protection layer, which consists of a finely woven cross fabric. This gives the tire a high resistance to punctures and damage. Despite its additional ply, the tire has a very good damping property and a high degree of flexibility to adapt perfectly to the ground. The revolutionary tubeless ready bead allows easy and uncomplicated mounting of the tire. For best results in sealing and in use, we recommend the use of the new Continental RevoSealant sealant.

## **FROM RURAL TO URBAN**

## The energy-saving SUV allrounder that gets you to both Rural and Urban. The partner for your commute, running errands and the weekend tour.

### PURE GRIP COMPOUND

**PureGrip Compound** is derived from an activated Silica compound and is a good example of how we integrate customer feedback continuously into our research and development. This mixture technology fits in perfectly alongside the BlackChili Compound. The name PureGrip does exactly what it says; exceptionally good grip and durability are the distinguishing features of this compound. Engineered with PureGrip in our Performance products in our road and mountain bike ranges.

With **PolyX Breaker™** car expertise comes to the bicycle tire sector. Polyester has been used successfully for years in car tires and has proved extremely effective. The extremely resistant polyester fibre is woven tightly crosswise. A very high fabric density is achieved which makes the breaker resistant not only to foreign bodies, but especially to punctures. The rolling resistance is not affected by this breaker.

The **ShieldWall System** combines the optimum combination of high puncture protection and the low rolling resistance with low weight. This is made possible by an additional, all-round puncture protection layer, which consists of a finely woven cross fabric. This gives the tire a high resistance to punctures and damage. Despite its additional ply, the tire has a very good damping property and a high degree of flexibility to adapt perfectly to the ground. The revolutionary tubeless ready bead allows easy and uncomplicated mounting of the tire. For best results in sealing and in use, we recommend the use of the new Continental RevoSealant sealant.

# THE TIRE FOR DIRT JUMPERS AND PUMP TRACKS

The Speed King features a meticulously crafted tread pattern that delivers grip and control on dirt tracks and ramps. With RaceSport construction, it offers the perfect balance of strength, durability, and weight, so you can land every trick and hit every corner with confidence. Whether you're launching off a jump or speeding down a slope, the Speed King reigns supreme.

## **BLACK**CH

With our unique tread compound, we have revolutionized the sport of cycling. With the legendary BlackChili Compound we have answered the eternal question of the best balance of grip and rolling resistance for cycling. The latest polymers as well as specially developed carbon black particles and filler materials guarantee unique performance, be it on a road, gravel or a mountain bike, for time trialling or downhill.

Developed together with professional mountain bikers, the **RaceSport** carcass unites light-weight construction with noticeably improved puncture protection for the perfect competition choice. Light: contains a particularly fine, flexible nylon fabric with an elaborately produced protective rubber coating. Fast and reliable: World Cup quality, low rolling resistance and puncture protection. Combined with our legendary BlackChili Compound, the right combination for XC and Marathon racing.

## **CHOOSE ALTER ROAD, CHOOSE TERRA**

For your way off-road. For more comfort. For the adventure. Be it the long tour, or the shortcut on your way home. Made to get you over rough and smooth.

With our unique tread compound, we have revolutionized the sport of cycling. With the legendary BlackChili Compound we have answered the eternal question of the best balance of grip and rolling resistance for cycling. The latest polymers as well as specially developed carbon black particles and filler materials guarantee unique performance, be it on a road, gravel or a mountain bike, for time trialling or downhill.

The extra all-round puncture protection layer renders the casings extremely durable and resistant to damage or penetration from foreign elements. Treads and sidewalls are equally protected, and are 25% lighter and offer 30% more puncture protection than their predecessors protected by DuraSkin®. Rolling resistance and absorption has also significantly improved. The new Revolution Tubeless Ready Bead improves the installation of Tubeless Ready Tires. For tubeless sealing we recommend the use of Continental RevoSealant.

**PureGrip Compound** is derived from an activated Silica compound and is a good example of how we integrate customer feedback continuously into our research and development. This mixture technology fits in perfectly alongside the BlackChili Compound. The name PureGrip does exactly what it says; exceptionally good grip and durability are the distinguishing features of this compound. Engineered with PureGrip in our Performance products in our road and mountain bike ranges.

The ShieldWall System combines the optimum combination of high puncture protection and the low rolling resistance with low weight. This is made possible by an additional, all-round puncture protection layer, which consists of a finely woven cross fabric. This gives the tire a high resistance to punctures and damage. Despite its additional ply, the tire has a very good damping property and a high degree of flexibility to adapt perfectly to the ground. The revolutionary tubeless ready bead allows easy and uncomplicated mounting of the tire. For best results in sealing and in use, we recommend the use of the new Continental RevoSealant sealant.

# **Pure CONTACT** < **TECHNOLOGY SIZES FEATURES** SUSTAINABILITY

## PURE CONTACT. BUILT TOUGH TO RIDE SMOOTH.

Created for urban riders who want confidence to commute, shop, and explore. A cutting-edge combination of Vectran and PolyX breaker technologies take protection to a whole new level, alongside more sustainable manufacturing using responsibly sourced rubber and more natural materials.

**Vectran** is spun from liquid crystal-polymer. This way a thermoplastic, multiple-thread yarn is created. As a comparison: This partially crystalline fabric is more cut-resistant than aramide and its tensile strength is five times higher than that of steel. A Vectran breaker is lighter, more flexible and effective against cuts than a comparable nylon breaker. Without effecting rolling resistance.

With **PolyX Breaker™** car expertise comes to the bicycle tire sector. Polyester has been used successfully for years in car tires and has proved extremely effective. The extremely resistant polyester fibre is woven tightly crosswise. A very high fabric density is achieved which makes the breaker resistant not only to foreign bodies, but especially to punctures. The rolling resistance is not affected by this breaker.

## THE ULTIMATE IN CONFIDENCE AND COMFORT

Specifically developed for the commuting and load-carrying demands of e-bikes. This high-mileage tire features a compact tread pattern to keep rolling resistance low, boosting the range of each battery charge.

### Safety **G** Pro

Engineered for the unique demands of modern e-bikes and cargo bikes up to 50km/h. Our SafetyPlus Pro Breaker technology combines highly flexible rubber with the proven strength of our tightly woven PolyX puncture-resistant fibers. The high elasticity keeps rolling resistance low, prolonging the e-bike battery life so you get moremiles from each charge. When riding with heavy loads, the SafetyPlus Pro Breaker contributes to confident handling through busy traffic and sharp corners, no matter the conditions.

SIZES

# **ALL YOU WOULD EXPECT**

An allrounder on any type of roads and paths that enhances every bike. Thanks to the plus in puncture protection, nobody will be left behind with a flat tire. ECE-R75-certified, designated for usage on e-bikes up to 50 km/h.

## Safety (+)

Specially designed for e-bikes up to 50 km/h, we have combined our **SafetySystem Breaker** with a highly flexible natural rubber. The result is an extremely cut and puncture resistant breaker ply which has a low rolling resistance thanks to its high elasticity. This helps saving battery life and the environment. High acceleration torques and fast speeds in turns are easily absorbed by the breaker. The specialist for fast e-bikes and rental bikes.

# WHEN THINGS GET TOUGH

Versatile allrounder which connects reliably to every surface. Equipped with the most popular tread pattern from the urban/tour range, especially designed for a high degree of safety thanks to its lamellar structure.

## Safety **O** System

The SafetySystem Breaker consists of a Kevlar-reinforced, high-strength nylon fabric. Puncture and cut resistant, whilst also being light and flexible, allowing the tire to adapt more effectively to the terrain. The breaker protects the carcass against foreign objects and contributes to a longer lifespan of the tire without significantly increasing weight or rolling resistance. Additionally, tires with SafetySystem have particularly comfortable handling characteristics.

## **CYCLING ON THE CITY PULSE**

Premium mobility for design enthusiasts. Urban tread pattern packed with the latest technology. The perfect symbiosis between light-rolling and puncture protection reflected in this specialized tire designed for the city jungle.

### PURE GRIP COMPOUND

PureGrip Compound is derived from an activated Silica compound and is a good example of how we integrate customer feedback continuously into our research and development. This mixture technology fits in perfectly alongside the BlackChili Compound. The name PureGrip does exactly what it says; exceptionally good grip and durability are the distinguishing features of this compound. Engineered with PureGrip in our Performance products in our road and mountain bike ranges.

## Safety 🕑 Pro

The SafetyPro Breaker is designed from nylon textile. Crosswoven textile fiber netting that is simultaneously robust and flexible. Maximum puncture protection with minimal added weight. The risk of punctures resulting from glass or sharp stones is substantially reduced.

## **UNITES SPEED AND COMFORT IN ONE TIRE**

The perfect choice for the city speedsters, single-speed bikes and fitness bikes. With its double layer of fabric breaker, the light-weight design and its roughened slick tread it shines especially on tarmac.

## Safety **O** System

The SafetySystem Breaker consists of a Kevlar-reinforced, high-strength nylon fabric. Puncture and cut resistant, whilst also being light and flexible, allowing the tire to adapt more effectively to the terrain. The breaker protects the carcass against foreign objects and contributes to a longer lifespan of the tire without significantly increasing weight or rolling resistance. Additionally, tires with SafetySystem have particularly comfortable handling characteristics.

# **THE PREMIUM WINTER TIRE**

The Top CONTACT Winter II Premium benefits from our know-how as leading manufacturer of winter tires for cars and trucks and offers full control on slippery, snowy roads and surfaces thanks to its grippy lamellar tread pattern.

Vectran is spun from liquid crystal-polymer. This way a thermoplastic, multiple-thread yarn is created. As a comparison: This partially crystalline fabric is more cut-resistant than aramide and its tensile strength is five times higher than that of steel. A Vectran breaker is lighter, more flexible and effective against cuts than a comparable nylon breaker. Without effecting rolling resistance.

# THE STATEMENT TIRE FOR THE CITY

Combines a modern tread pattern design with the latest technology. Built with a tuned race construction while damping for comfort a matching mix for the urban ride. Its black reflective stripe\* blends perfectly with the sidewall.

With our unique tread compound, we have revolutionized the sport of cycling. With the legendary BlackChili Compound we have answered the eternal question of the best balance of grip and rolling resistance for cycling. The latest polymers as well as specially developed carbon black particles and filler materials guarantee unique performance, be it on a road, gravel or a mountain bike, for time trialling or downhill.

\* Does not meet the certification standard ECE-R88. Does not support reflective properties as per StVZO (Germany).

With **PolyX Breaker™** car expertise comes to the bicycle tire sector. Polyester has been used successfully for years in car tires and has proved extremely effective. The extremely resistant polyester fibre is woven tightly crosswise. A very high fabric density is achieved which makes the breaker resistant not only to foreign bodies, but especially to punctures. The rolling resistance is not affected by this breaker.

# **GIVE SOMETHING BACK TO YOUR CITY!**

The Urban Taraxagum is the first serial product made of dandelion rubber combining local production with minimal transport distances in the supply chain - ideal for the urban ride.

**Vectran** is spun from liquid crystal-polymer. This way a thermoplastic, multiple-thread yarn is created. As a comparison: This partially crystalline fabric is more cut-resistant than aramide and its tensile strength is five times higher than that of steel. A Vectran breaker is lighter, more flexible and effective against cuts than a comparable nylon breaker. Without effecting rolling resistance.

## TARAXA GUM

The Urban Taraxagum by Continental is the first serial bicycle tire made from dandelion rubber, for which we established the brand **Taraxagum.** The project is embedded in a comprehensive sustainability strategy, covering economic, ecological and social aspects. Through significantly shorter distances from the fields and our European tire plants we reduce efforts in logistics and transport and use resources more efficiently.

## **A ROBUST TIRE WITH A MODERN LOOK**

High reliability and always on time in urban traffic: Solid tire for city bikes. Proven successful on tarmac as well as on gravel thanks to good traction provided by its broad contact area in the tread pattern.

Anyone looking for a reliable everyday companion will go for a tire with EXTRA PunctureBelt. This rugged rubber breaker, combined with the rubber-reinforced sidewalls of the tire, ensures a high level of puncture protection and sidewall abrasion. Where durability is the main focus, there is also a solid tire version.

Suitable for E-Bikes: For our E-Bike tire we fall back on over 100 years' experience with moped and motorcycle tires. All of our city/trekking tires are rated to a standard speed of at least 25 km/h. Those tires marked E50 are also certified for S-Pedelecs. With their high quality structure, puncture protection is high and the rolling resistance is low offering protection from premature wear brought about by the additional driving force.

# **A LOYAL COMPANION ON YOUR REGULAR RIDES**

Tarmac, gravel, urban environment - the right tire for your daily ride thanks to robust puncture protection and an additional rubber layer for high milage. Available in a large range of colors and sizes.

Anyone looking for a reliable everyday companion will go for a tire with EXTRA PunctureBelt. This rugged rubber breaker, combined with the rubber-reinforced sidewalls of the tire, ensures a high level of puncture protection and sidewall abrasion. Where durability is the main focus, there is also a solid tire version.

Suitable for E-Bikes: For our E-Bike tire we fall back on over 100 years' experience with moped and motorcycle tires. All of our city/trekking tires are rated to a standard speed of at least 25 km/h. Those tires marked E50 are also certified for S-Pedelecs. With their high quality structure, puncture protection is high and the rolling resistance is low offering protection from premature wear brought about by the additional driving force.

## **IT'S TIME TO RACE:** THE CLASSIC FOR STRONG ACCELERATION

Robust all-rounder appearing at the sharp end in all the major cycling races around the world. Agile and fast, adapts to the competition in all road conditions.

## **BLACK**CHIL

With our unique tread compound, we have revolutionized the sport of cycling. With the legendary BlackChili Compound we have answered the eternal question of the best balance of grip and rolling resistance for cycling. The latest polymers as well as specially developed carbon black particles and filler materials guarantee unique performance, be it on a road, gravel or a mountain bike, for time trialling or downhill.

**Vectran** is spun from liquid crystal-polymer. This way a thermoplastic, multiple-thread yarn is created. As a comparison: This partially crystalline fabric is more cut-resistant than aramide and its tensile strength is five times higher than that of steel. A Vectran breaker is lighter, more flexible and effective against cuts than a comparable nylon breaker. Without effecting rolling resistance.

## Safety **O** System

The SafetySystem Breaker consists of a Kevlar-reinforced, high-strength nylon fabric. Puncture and cut resistant, whilst also being light and flexible, allowing the tire to adapt more effectively to the terrain. The breaker protects the carcass against foreign objects and contributes to a longer lifespan of the tire without significantly increasing weight or rolling resistance. Additionally, tires with SafetySystem have particularly comfortable handling characteristics.

TECH

## **IT'S ALL ABOUT HOW YOU MIX IT**

With our unique tread compound, we have revolutionized the sport of cycling. With the legendary BlackChili Compound we have answered the eternal question of the best balance of grip and rolling resistance for cycling. The latest polymers as well as specially developed carbon black particles and filler materials guarantee unique performance, be it on a road, gravel or a mountain bike, for time trialling or downhill.

### PureGrip Compound

TECH

## **PURE GRIP FOR EVERYONE**

PureGrip Compound is derived from an activated Silica compound and is a good example of how we integrate customer feedback continuously into our research and development. This mixture technology fits in perfectly alongside the BlackChili Compound. The name PureGrip does exactly what it says; exceptionally good grip and durability are the distinguishing features of this compound. Engineered with PureGrip in our Performance products in our road and mountain bike ranges.

## **CUT AND PUNCTURE PROOF**

With PolyX Breaker<sup>™</sup> car expertise comes to the bicycle tire sector. Polyester has been used successfully for years in car tires and has proved extremely effective. The extremely resistant polyester fibre is woven tightly crosswise. A very high fabric density is achieved which makes the breaker resistant not only to foreign bodies, but especially to punctures. The rolling resistance is not affected by this breaker.

## **LIGHT AND SLEEK**

The Nytech Breaker is based on the technology of our SafetySystem puncture protection. Made of nylon fibre and similar to Kevlar, it reliably protects against punctures and cuts. It also has particularly low rolling resistance and reduced weight, perfect for our performance range of road tires.

### Hardshell ProTection

TECH

## **MORE IS WHAT YOU GET**

Puncture protection and mileage are the strengths of Hardshell-ProTection. A wider PolyX Breaker<sup>™</sup>, the specialist against punctures, under the tread centre and shoulders provides for great reliability. The three-ply – each layer with 60 TPI – carcass covers the entire tire and makes it a real bastion against urban detritus. The outer sidewalls of the tire are reinforced with DuraSkin<sup>®</sup> fabric providing even more reliablility due to the casing being so well protected. Hardshell tires are the puncture-resistant flagship amongst racing tires.

#### WORKSHOP

#### **HERMETIC PLUS**

#### COMPACT

With the **ContiTube program**, you can find the inner tube most suited to your needs. Depending on your tire dimensions and purpose, different sizes, types, valve types and widths are available.

#### All

The all-rounder for day to day demands. Available in all usual dimensions.

#### Light und Supersonic

Perceptible optimization of weight and rolling resistance due to thinner material. ! Light tubes generally require more frequent reinflating.

#### **Hermetic Plus**

The all-round carefree product. Designed for the most comprehensive puncture protection and air retention due to enhanced butyl content and increased wall thickness.

#### **Freeride und Downhill**

Extra strong and increased volume. Effectively protects against punctures thanks to thicker material.

#### TPU

Small but mighty. Highest grade of micrometer-thick TPU deployed across seven sealed layers. Suitable for road and off-road riders.

## **TPU TUBES**

## A seven-layer lightweight TPU Inner Tube for performance-focused and space-saving road, gravel and MTB riders.

Available in a wide range of sizes from 25/35-622, ContiTPU is premium, lightweight yet durable and suitable for both road and off-road riders.

The highest grade of micrometer-thick TPU deployed across seven sealed layers maximises airtightness and durability. The tubes are uncoloured to further ensure the highest material

quality and prevent air retention issues caused by dye-related surface imperfections. Every ContiTPU tube is quality-checked post-production. The base of the valve shaft is slightly conical in shape to improve fit to the wheel rim and reduce unwanted movement, while the value is internally threaded to allow for the use of valve extensions or a replacement valve core.

### **COMPACT**

## **IMPORTANT INFORMATION**

### **1. TPU tubes must never be used in conjunction with rim**

brakes. Excessive heat exposure can lead to a sudden loss of air pressure.

### 2. Use suitable rim tape to protect the TPU tube. Otherwise,

it can become damaged.

**3. During mounting, the TPU tubes must not be inflated** over 0.3 bar. Over-inflation during this part of the process can excessively stretch the tube and render it unusable.

- 4. Ensure the valve hole in the rim is the correct diameter. If the valve hole is too large, the valve can twist or shear off.
- 5. Pay close attention when mounting the tube. Always ensure the tube or valve isn't trapped, twisted or damaged.
- 6. TPU tubes must never be re-used with a smaller tire! If you are mounting a smaller tire, then it is necessary to use a new tube.

#### **INSTRUCTION 7 - 9**

## **TIPS AND TRICKS**

In individual cases where the tire bead does not properly sit on the inside of the rim, try unscrewing the valve nut and pushing the valve back. Valves with a round rubber end have a lower volume than those with a rectangular rubber end. Maybe you could try to change your existing valve to fit your tire accordingly.

#### **RECOMMENDED AMOUNTS OF SEALANT PER TIRE**

0	Dimension	Filling amour
ROA	25 mm	30 - 60 ml
R	28 mm	60 - 90 ml
	Dimension	Filling amour
0	2.0 - 2.1	80 - 100 ml
	<b>2.2 - 2.3</b>	100 - 120 ml
2	2.4 - 2.5	120 - 150 ml
	2.6 - 2.8	150 - 180 ml

**INSTRUCTION 1-3** 

**INSTRUCTION 4-6** 

Г	

#### **INSTRUCTION 7-9**

Check both rim and rim tape. Only use Tubeless ready rims. Ensure that the rim tape covers the rim well with at least two layers.

Mount the Tubeless valve first. 2 Install it from the inside of the rim and tighten the nut. Press your finger on the rubber end of the valve to secure a better fit. Only tighten the nut by hand, do not use any tools.

Before the initial inflation you can 3 apply some soapy-water or a mounting pad on the contact points between tire and rim bed. This can help improve mounting the tire on the rim.

	 L
	 L
	 L
	L

#### **INSTRUCTION 7-9**

Mount the Tubeless tire on the rim in correct orientation of rotation. Ensure no loose pieces (e.g. sand, plastics) are found inside. Due to the tighter dimension tolerances of a Tubeless tire compared to a normal Clincher tire it may be helpful for you to use tire levers.

To fit the tire between the hooks, you 5 may need a higher amount of air in the first instance. If you are using a floor pump, it is better to maintain a constant momentum within the first few seconds. A modern floor pump with a second inflatable cartridge can help to achieve this.

If a floor pump does not fill and accurately seat the tire, a compressor could help. You may need to adapt to the respective bicycle valve.

Please note, that the pressure in the size overview indicates the recommended pressure on the lower end and the maximum pressure on the upper end.

### Support

### **INSTRUCTION 1-3**

	_	٦
_		
-		
_		

**INSTRUCTION 4-6** 

Г	٦
L	

#### **INSTRUCTION 7-9**

To enhance the air volume, unscrew 7 the valve core. Pump it up and screw the valve core in again.

For the best puncture resistance, 8 we recommend to fill approximately 30 - 60 ml of tire sealant through the valve. Considering it will dry over time, it is best to check and refill it every 3 - 6 months.

### Important:

Do not insert the tire sealant with the valve at a 6 o'clock position! The valve should be located at the 5 or 7 o'clock position.

If you are using tire sealant: For in-9 flation place the tire with the valve at the 11 or 1 o'clock position. Otherwise sealant could leak into the valve or put too much turbulence into it. It could dry faster or lock up the valve core.

Please be advised that the use of a **CO2** cartridge can clump the sealant particles.
